

[Task Day 1&2]

1. Write a blog on Difference between HTTP1.1 vs HTTP2

HTTP1.1	HTTP2
It usually works on the text format.	It works on the binary format.
It compresses data by itself.	It uses HPACK for data itself.
It uses requests resource inlining for getting multiple pages.	It PUSH frame by server that collects all multiple pages.

2. Write a blog about objects and its internal representation in JavaScript.

- In JavaScript object are standalone entity along with properties and type.
- Object is a reference datatype.
- Primitives datatype contain one value but object contain many values in the form of key: per value.
- Every object has some property associated with some values.
- These values can be accessed using these properties associated with them.
